

## The DRS Group and Computhink Strengthen Alliance with Enhanced Product Integration

### *Computhink ViewWise® 6.x is newest file destination for DRS Group's Professional Document Conversion Services*

Computhink, Inc. is pleased to announce its Preferred Strategic Partnership with the DRS Group.

Computhink provides best-in-class Integrated Document Management (IDM) and image-enabling software for secure enterprise information sharing, targeting Small and Medium Enterprise (SME) class customers operating on Windows, LINUX, or Novell platforms. Computhink has over 4,000 worldwide customers in government, financial services, education, healthcare, industrial and utility organizations. Information on Computhink and its products can be found at [www.computhink.com](http://www.computhink.com).

The DRS Group was founded in 1964 with the goal of providing a less costly and more efficient means of document conversion and imaging. DRS is one of the oldest and one of the largest service bureaus in the United States, with offices in Norcross, Georgia and other strategic locations in the United States. DRS offers a complete line of onsite and outsource services (such as Imaging, Data Entry, Data Capture, and Micrographics), turnkey systems, imaging-related hardware and document management solutions. Information on DRS can be found at <http://www.drsimaging.com/>.

With Computhink's ViewWise®, users can archive, manage, and retrieve images and documents efficiently and securely. Images, application files, email, media, and more are stored, indexed and retrieved with intuitive interfaces, allowing access to the database via PCs and three types of Web clients. Document storage is encrypted with 128-bit encryption to ensure data security.

The document conversion services provided by DRS will allow captured images and related metadata to be automatically captured into the ViewWise application. Users can automatically move data and images into ViewWise in real time or in pre-scheduled intervals based on business needs and resource constraints. The result is a seamless end-to-end solution that takes document images and data from capture and processing in OCR by the DRS Group to ViewWise for storage and retrieval.

"We're very pleased with our strategic partnership with DRS, offering our mutual customers a complete front to back seamless solution", said John Stelmach President Computhink, Inc.

"Adding ViewWise as repository for our document capture services shows our ongoing commitment to developing efficient, adaptable solutions for our customers," said Fred Gorton, Executive Vice President of The DRS Group, "ViewWise is a powerful storage and retrieval application, and we're excited about offering direct integration to the product."

**Computhink, Inc.** is a privately held corporation, incorporated in the state of Illinois in 1994 and has just recently celebrated its 11th year of operations. Our federal tax ID # is 36-3953691 and our D&B # is 87-637-4141. Products and services are distributed world wide through an array of consultants, integrators and value added resellers. Computhink is adequately staffed and has available resources to handle any project, either with our Reseller Partners or if necessary, direct with customers. Please reference our website at [www.computhink.com](http://www.computhink.com) for additional information.

Computhink, Inc. is a member of a group of affiliated companies (common shareholders and investors and lenders) which enjoy revenue realizations in excess of \$200 million world wide (2004).

In addition to the financial support available from the group of affiliated companies referenced above, Computhink Inc. (USA) also maintains liberal lines of credit and financial resources to fund peak working capital requirements as it rolls out major projects world wide.

Computhink's ViewWise Integrated Document Management software solutions are sold world wide. Source code is held in escrow at:

Iron Mountain Intellectual Property Mgt  
PO BOX 27131  
New York, NY 10087-7131

A utility is available that enables the export of ViewWise IDM encrypted document pages / metadata. This facilitates an existing fall back strategy for migration to another document management system in the event that a customer wishes to do so.

Thank you for your interest in Computhink, Inc. We appreciate the opportunity to work with your business toward mutual growth and success.
