D2Xchange Partners with Computhink, Inc. to Extend Electronic Document Management Service Offerings

Greenwood Village, CO – D2Xchange, LLC, a full-service data and document management company headquartered in Greenwood Village, CO, announced today that it will partner with Computhink, Inc. to offer ViewWise, an integrated document management and e-mail archiving software, to small and medium-sized businesses (SMB) across Colorado.

Nancy Sauer, president, D2Xchange, believes that efficient document management is a critical need in virtually any organization, regardless of size.

“Despite advances in technology,” Sauer says, “90% of the documents we handle in the workplace are still paper-based. Managing documents electronically allows an organization to streamline work processes and increase productivity by capturing, storing, processing, displaying and managing business information in digital form. It secures sensitive data and documents and reduces the expense and hassle of managing physical storage space.”

“ViewWise is well designed for the SMB market,” Sauer continues. “It provides a comprehensive, in-house document management solution without significant customizations. It offers an intuitive, folder-based user interface that requires minimum training. Because it is tightly integrated with Novell GroupWise, it also provides a simple and affordable e-mail archival solution for organizations facing SOX, FRCP, SEC, HIPPA, and other regulatory requirements.”

The addition of ViewWise completes the D2Xchange best-of-breed product suite which also includes Digitech Systems' PaperFlow, PaperView and ImageSilo software.
