

## **Hughes-Calihan Corporation Partners with Computhink, Inc. to Extend Electronic Document Management Service Offerings**

**October 9, 2007 (Phoenix, AZ)** – Hughes-Calihan Corporation, a full-service office product, data and document management company headquartered in Phoenix, AZ, announced today that it will partner with Computhink, Inc. to offer ViewWise, an integrated document management and e-mail archiving solution, to small and medium-sized businesses (SMB) across Arizona and Nevada.

Peter Calihan, president, Hughes-Calihan Corporation, believes that efficient document management is a critical need in virtually any organization, regardless of size.

“Despite advances in technology,” Calihan says, “90% of the documents we handle in the workplace are still paper-based. Managing documents electronically allows an organization to streamline work processes and increase productivity by capturing, storing, processing, displaying and managing business information in digital form. It secures sensitive data and documents and reduces the expense and hassle of managing physical storage space.”

“ViewWise is well designed for the SMB market,” Calihan continues. “It provides a comprehensive, in-house document management solution without significant customizations. It offers an intuitive, folder-based user interface that requires minimum training. Because it is tightly integrated with Novell GroupWise, it also provides a simple and affordable e-mail archival solution for organizations facing SOX, FRCP, SEC, HIPPA, and other regulatory requirements.”

The addition of ViewWise completes the Hughes-Calihan Corporation’s best-of-breed product suite which also includes Lanier, Konica-Minolta, Hewitt Packard, OCE’, RISO Systems’ QuickTag, ImageDirector, and DocumentMall software.
