Computhink Becomes a Microsoft “Front Runner” With Its ViewWise Document Management Software

Chicago, Illinois — May 1, 2006 — Computhink today announced its ViewWise Integrated Document Management application using Microsoft SQL Server 2005, has earned the company Front Runner status from Microsoft Corp.

ViewWise Version 5.6.3 in combination with Microsoft SQL Server 2005 lets customers securely store their digital and scanned documents and make them instantly available to internal and external users. It also offers powerful e-mail archiving capabilities, helping organizations comply with regulations such as Sarbanes-Oxley, SEC and HIPAA. SQL Server 2005 is the next-generation data management and analysis software that will deliver increased scalability, availability and security to enterprise data and analytical applications while making them easier to create, deploy and manage.

“Computhink is excited to be among the first companies to support SQL Server 2005. Technology leadership is what our customers expect from us and SQL Server 2005 is a great platform,” said Frank Wasti, Vice President of Sales and Marketing – Americas at Computhink. “Its scalability and productive features will help both our enterprise and small & medium business customers.”

“Microsoft has always been committed to the success of our broad ISV partner community and will continue to rely heavily on that community to drive innovative solutions to market,” said Pradeep Rathinam, general manager of U.S. ISV Strategy in the U.S. Partner Group at Microsoft. “The Front Runner program was designed to provide our partners with the best development environment possible and give them the technical and marketing tools they need to be successful over the long term.” Microsoft wanted to ensure that ISVs had access to a full host of benefits to enable them to bring best-of-breed solutions to market more quickly and effectively. Giving ISVs the resources they need to fast-track the development of these applications enables customers to start taking advantage of the increased scalability, availability and security of the application built on top of SQL Server 2005 almost immediately, increasing their company’s productivity.

About ViewWise

ViewWise is a state-of-the-art document management and e-mail archiving solution, developed by Computhink. Available in Enterprise and Small & Medium Business versions it offers powerful features such as full text search, CD/DVD publishing, check-in/check-out and annotation tools.
