Computhink Continues to Make Enterprise-Level Features Affordable with ViewWise 6.1

Lombard, IL – February 20th, 2008 – Computhink, committed to its goal of offering a Document Management / Content Management Solution with Enterprise-Level features priced for Small to Medium sized Businesses (SMB), today released ViewWise 6.1. This new release adds document workflow, extended search capabilities, to-do lists, enhanced security, extended output to pdf options and more.

"Computhink is committed to making Enterprise-Level features available for the SMB Market and at a price that they can afford," explains Vince Smolek, Director of Product Management for Computhink. "ViewWise 6.1 speaks to this commitment."

The Document Management demands of today's SMB Market require features previously targeted to large enterprises such as workflow and to-do lists. Customers of all sizes can benefit from automatic workflows to route electronic files from user to user and to-do lists to remind particular users of the tasks they have to complete. ViewWise 6.1's new workflow and to-do list features allow for control and tracking of assigned tasks while allowing the necessary files to stay organized in central electronic repository, eliminating the need to print and manually manage paper files. This reduced reliance on a paper file process is both more efficient and saves on cost, and can even act as an important step towards becoming a more "green" organization.

ViewWise 6.1 also offers extended search options for locating scanned and electronic files, additional security options for controlling access, and the ability to instantly view a documents history. Add to this the new options for converting and outputting to pdf, Vista and Office 2007 support, and access to these features via either a web or desktop clients and it becomes evident Computhink is continuing to meet its goals to the SMB Market with ViewWise 6.1.

Computhink will be demonstrating the new features of ViewWise 6.1 at AIIM 2008 in Boston, MA on March 3rd thru the 6th in Booth #3168. For more information, contact Computhink.
