Seamless Export of ABBYY Content to Computhink's ViewWise

Lombard, IL, February 17, 2009 – Computhink, Inc., a leader in providing Document and Content Management Solutions for small to mid-sized (SMB) organizations, has officially announced an export script that will allow for integration with ABBYY's popular FlexiCapture product line.

"We believe that the addition of an ABBYY script further heightens the flexibility of our product that already boasts a broad array of integration capabilities," said Computhink CEO John Stelmach. "Now anyone running FlexiCapture can be seamlessly exported into our ViewWise Document Management Solution."

The new script effortlessly and accurately exports ABBYY content into the ViewWise Document Management solution. This allows customers to boast a complete capture and document management solution. With this, customers are empowered with the ability to easily and effectively digitize paper records, heighten document security and control, reduce costs, comply with federal regulations, reduce retrieval times, and increase productivity and accountability while working off a central repository.

ABBYY's FlexiCapture can capture many types of documents, including forms (such as questionnaires, tests, insurance forms, tax returns), semi-structured documents (such as invoices, purchase orders, waybills), as well as unstructured documents (such as letters, contracts, articles). This comprehensive solution accurately transforms the information into useable data that ViewWise can then store.

The flexibility of Computhink's ViewWise Document Management Solution is one of the many inherent benefits of the software. Through the use of its Application Enabler, ViewWise is able to integrate with almost any software program, which yields a popular selling tool. In addition, competitive pricing, a dedicated marketing team, and other product features such as Workflow, Email Archival, Front End Capture, Electronic Signature (Signwise) will continue to keep ViewWise and Computhink atop the industry.
