## Computhink Announces ViewWise Document Management Integration with Muratec ScanTag Metadata Capture

**Lombard, IL, March 31, 2010** – Computhink, Inc., a leader in providing Document and Content Management Solutions to small to medium-sized organizations, has announced a successful integration with the ScanTag metadata capture solution for Muratec multifunction printers.

Computhink's ViewWise integrates into a company's existing infrastructure, supplying the missing piece of the puzzle for secure information sharing and compliance. ViewWise streamlines business processes, improves customer service, reduces costs and ensures compliance. By integrating Muratec multifunction solutions into a ViewWise environment, users have a convenient method of digitally capturing and indexing paper documents from their individual workgroup.

"The small to medium-sized business market has been in need of a total solution that the ViewWise and Muratec integration now provides, and we are pleased to integrate our product with affordable Muratec ScanTag-enabled devices," said John Stelmach, President, Computhink, Inc. "By integrating these products, both Muratec MFP and ViewWise users can further enhance the ROI they are already experiencing by using them separately, and when combined they will see their business processes streamlined."

Available on select Muratec MFP's, ScanTag enables users to enter indexing fields on the MFP touch-screen to facilitate seamless document archiving into the ViewWise Document Management Solution.

"Within companies of all sizes the demand is growing for document management solutions to oversee the retention and management of business-critical information," said Jim D'Emidio, President, Muratec America, Inc. "We believe ViewWise offers SMB's an outstanding document management solution that is not only user-friendly and cost-effective, but enables them to simplify their document workflow."

### About Computhink
